PROFESSIONAL SUMMARY

Full-stack developer (MERN) with hands-on experience building and deploying production-style web applications with secure authentication, REST APIs, and MongoDB. Backend internship experience shipping real features for a live marketplace platform. Strong Java/OOP and DSA foundation from academic coursework; comfortable across the stack from database design to deployed UI.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C, SQL
Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control
Databases: MongoDB, MongoDB Atlas, MySQL, Mongoose ODM, Schema Design
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering
Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse IDE, Railway, Vercel
Practices: API testing, version control workflows, unit testing basics

EXPERIENCE

Software Development Intern — Hexart.in (CSR Initiative of Hexagon) *2026*

- Contributed to AgriConnect, a farmer–buyer marketplace, by building backend services, REST APIs, and secure authentication using Node.js, Express.js, and MongoDB.
- Collaborated on database integration, product management, and backend optimization to improve application performance and user experience.

PROJECTS

Team Task Manager *2026*

- Built a full-stack task management application using React, Node.js, Express.js, and MongoDB Atlas, featuring JWT authentication, role-based access control, REST APIs, and a dashboard for project analytics.
- Designed and implemented the REST API layer connecting the React frontend to the Express/MongoDB backend, handling task creation, assignment, and status updates.
- Deployed the frontend and backend separately (Vercel and Railway) to simulate a real production environment.

Live: Demo Application

Cyber Threat Intelligence (CTI) Platform *2026*

- Developed a cyber threat intelligence platform using Machine Learning and NLP to analyze threat data and generate actionable insights.
- Built visualization modules for threat monitoring and supported real-time cybersecurity analysis.
- Structured and processed threat data pipelines to feed the ML/NLP analysis components consistently.

Java Swing Book Store Management System *2025*

- Developed a desktop bookstore management application using Java Swing and MySQL for inventory, billing, and customer management.
- Implemented CRUD operations and automated inventory updates to improve data accuracy and reduce manual effort.
- Designed the MySQL schema and queries powering billing, inventory, and customer records for the application.

EDUCATION

JB Institute of Engineering and Technology *2022–2026*
Bachelor of Technology, Information Technology — CGPA: 9.40

St. Ann's High School
ISC Class XII (2022) – 91% | ICSE Class X (2020) – 90%

EXTRACURRICULAR ACTIVITIES

- Head, Innovative Events — led planning and execution of both technical and non-technical college events, coordinating teams and driving strong participation outcomes.
- Participated in a hackathon, building a solution for urban traffic density prediction.
